Homework 11

Homework 11: Tasks 1/2

Hello everyone!

The task of this exercise is to create your own executable file from a Python code! Your task:

Use our GUI from Exercise 10 or your solution from homework 10. **With your full name in the window title. Without your name, the exercise will not be passed.**

- Get PyInstaller
- Create from your python file an executable with (1) no command line/shell window shown **and use (2) our dsss.icon as icon file**
- Upload a GIF showing that it opens with double click (no longer than 5 seconds)

Hint 1: <https://pyinstaller.readthedocs.io/en/stable/usage.html>

Hint 2: Use a tool like ScreenToGif to create your GIF

Homework 11: Task 2/2

In case you didn't do the Homework 10, you can use the file “Ex10_solution.py” from StudOn.

Note: your executable should work with the settings.json file and it must show **your full name in the window title. Without your name, the exercise will not be passed.**

- Create from the python file an executable with (1) no command line/shell window shown and **use (2) our dsss.icon as icon file**
- Upload a GIF showing that it opens with double click (no longer than 5 seconds).
